

## THE CONCEPT

EXPLOITS THE RHEOLOGY OF THE MEDIUM FORCING PARTICLES TO MOVE CLOSER TOGETHER, THEREBY INCREASING DENSITY AND RELEASING WATER TRAPPED BETWEEN SOLIDS.

## THE ADVANTAGES

DENSITY INCREASES CAN BE MEASURED WITHIN MINUTES.

ELIMINATES RAT-HOLING IN THE COMPACTION ZONE BED.

EXTENDS THE COMPACTION ZONE BY PRODUCING A HIGHER DENSITY UNDERFLOW.

RELEASES POTENTIAL BUILD-UP IN THICKENER.

POWER CONSUMPTION OF LESS THAN 2 kW.
